Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Shea et al. (5,782,325) in view of Stube (5,498,101).

O'Shea et al. disclose, in figs. 1, 2 and 10, a luggage comprising a flexible fabric comprising both a lateral side 12 and a bottom side 15, and L shaped rigid board member (40 or 90) cover by said fabric, a telescoping handle fastened to the inside of the board member, the board member including a precut slots to receive wheel housing, a L-forming bracket on the outside the board member.

O'Shea et al. does not disclose a support foot fastened to the bottom side.

Stube teaches a support foot fastened to a bottom side of carrying case.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the luggage of O'Shea with a support foot fastened to the bottom side, as taught by Stube, in order to support the luggage when it in an up right position.

3. Claims 1, 2 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Himbeeck (5,566,797) in view of O'Shea et al. (5,782,325) and further in view of Stube (5,498,101).

Van Himbeeck discloses, in figs. 1, 3 and 15, a luggage comprising a flexible fabric 132 comprising both a lateral side 34 and a bottom side 38, and L shaped rigid board member 56 cover by said fabric (see col. 8, lines 30-38), a telescoping handle fastened to the inside of the board member, the board member including a precut slots 138 to receive wheel housing.

Van Himbeeck does not disclose a forming bracket on the outside the board member.

O'Shea et al. teach a carrying case having L shaped rigid board member and a L-forming bracket on the outside of the board member.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a L-forming bracket on the outside of the board member in the Van Himbeeck carrying case, as taught by O'Shea et al., in order to secure the board member to the cover material of the luggage.

Van Himbeeck in view of O'Shea et al. does not disclose a support foot fastened to the bottom side.

Stube teaches a support foot fastened to a bottom side of carrying case.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the luggage of Van Himbeeck with a support

foot fastened to the bottom side, as taught by Stube, in order to support the luggage when it in an up right position.

4. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Lathouwer (6,702,164) in view of O'Shea et al., and further in view of Stube.

Lathouwer discloses, in figs. 1-4, a luggage comprising a L-shaped rigid board member 2, a telescoping handle fastened to the inside of the board member, the board member including a precut slots 8 to receive wheel housing, and the case comprising plurality of compartments, and a flexible fabric covering the board member,

O'Shea et al. teach a bracket as claimed, and Stube teaches a foot support.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify De Lathouwer luggage with a support foot, and a bracket in order to support the case in an up right position and secure the board member to cover material of the carrying case.

Response to Arguments

5. Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
